

Intro Slides

Token Management Platform

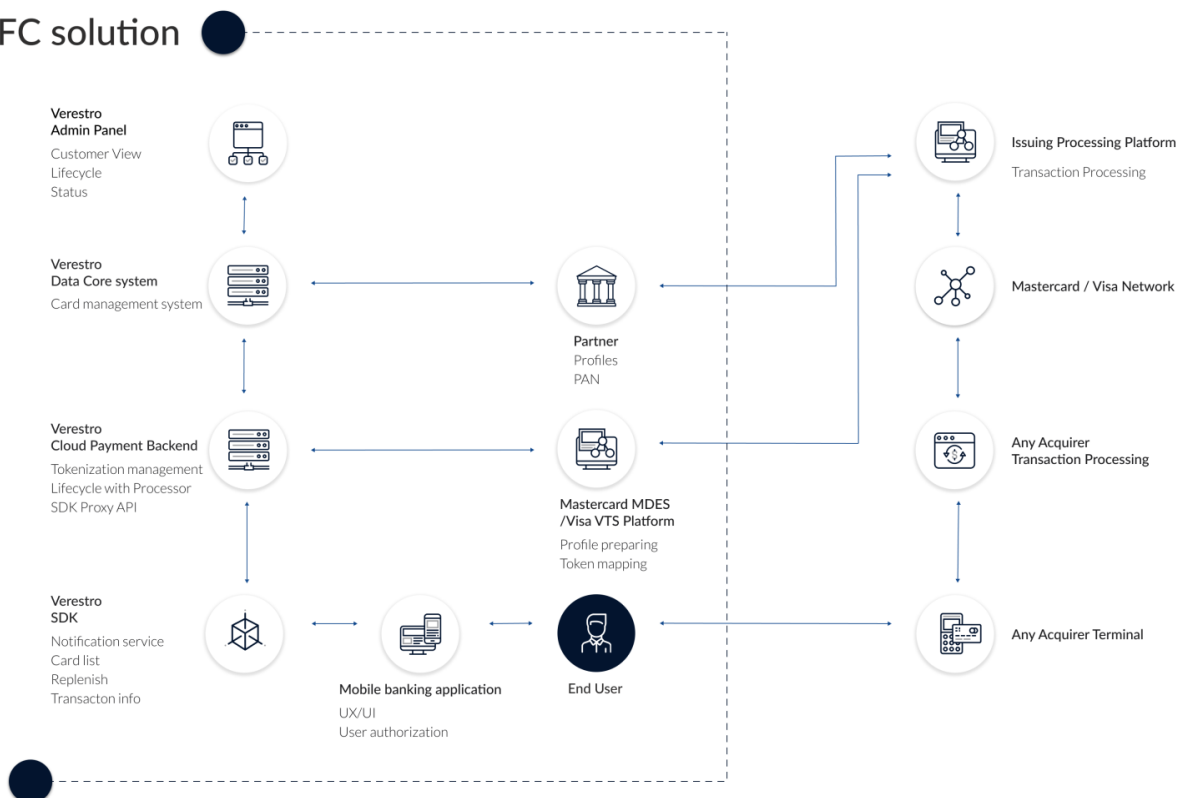

The TMP platform is an easy way to implement and manage tokenization process for Issuer. Thanks to this solution, Issuer can manage tokens with various token requestors with minimum development. The TMP platform ensures end to end token management process including configuration, customization and integration.

- API: pre-digitization process, token lifecycle management, notifications and reporting, push provisioning.
- Readiness: Live.
- Implementation time: 4 weeks from set up project.
- Administration Panel for management: Yes.
- Fully compliant with Google Pay, Apple Pay, Fitbit Pay, Samsung Pay etc.
